

Case Study 1

GreenLeaf Supermarkets operates a chain of retail stores across India. To maintain uniformity in operations, the management has established several standing plans.

- The company promotes environmental sustainability and encourages the use of eco-friendly packaging materials.
- Employees are strictly prohibited from using mobile phones while attending customers.
- At the billing counter, the cashier must scan products, generate the bill, collect payment, and issue the receipt in the same order.
- The housekeeping staff follows a specific technique using designated cleaning equipment and disinfectants to sanitize the store every morning.

Questions

1. Identify the standing plan promoting environmental sustainability.
2. Identify the standing plan prohibiting mobile phone usage while attending customers.
3. Identify the standing plan followed at the billing counter.

Case Study 2

BrightWave Electronics Ltd. manufactures mobile accessories. To ensure smooth functioning, the company has laid down certain guidelines.

- The company believes in providing equal opportunities to all employees and does not tolerate discrimination based on gender, religion, or caste.
- Every employee entering the factory must wear an identity card. Employees without an identity card are not allowed inside the premises.
- Whenever a customer complaint is received, the customer care executive must first register the complaint, then forward it to the technical team, and finally inform the customer about the resolution.
- The accounts department uses a specific software and follows a fixed process to generate monthly salary slips.

Questions

1. Identify the standing plan reflected in the company's belief of providing equal opportunities.
2. Identify the standing plan related to wearing identity cards.
3. Identify the standing plan followed while handling customer complaints.
4. Identify the standing plan used for generating salary slips.

Case Study 3

FreshBite Foods Pvt. Ltd. noticed a decline in sales of its packaged snacks. The management carefully studied market trends and discovered that customers were increasingly demanding healthier food options. After examining different possibilities, the company decided to launch a range of baked snacks. Detailed plans were prepared regarding production, marketing, and distribution. Sales targets were set, and various alternatives for advertising were compared before selecting digital marketing as the most suitable option.

Questions

1. Identify the planning step where the company studied market trends and customer preferences.
2. Which planning step is reflected when the company decided to launch baked snacks?
3. Identify the step where detailed plans regarding production, marketing, and distribution were prepared.
4. Which planning step is reflected when various advertising alternatives were compared?
5. Identify the step where sales targets were set.

Case Study

SkyHigh Airlines planned to improve customer satisfaction. The management first decided that customer complaints should be reduced by 30% within one year. They then collected information about passenger feedback, service quality, and competitors' practices. Several alternatives such as staff training, technology upgrades, and additional customer service desks were considered. After evaluating the advantages and costs of each option, the company selected staff training and technology upgrades. Budgets and action plans were then prepared for implementation.

Questions

1. Identify the planning step where the company decided to reduce customer complaints by 30%.
2. Which planning step is reflected by collecting passenger feedback and competitor information?
3. Identify the planning step where different alternatives were considered.
4. Which planning step is reflected when the company selected staff training and technology upgrades?
5. Identify the planning step where budgets and action plans were prepared.
